PROFESSIONAL SUMMARY

Financial Data Analyst and Full Stack Developer with experience in financial planning and analysis, SQL reporting, data visualization, and web application development. At Compass Group Canada, analyze financial performance across multiple units, prepare forecasts and variance reports, and build Excel models to support business decisions. Developed full-stack projects using React, Node.js, Django, PostgreSQL, and MongoDB, as well as an analytics dashboard using SQL and Power BI.

TECHNICAL SKILLS

Analytics & finance: FP&A, budgeting, forecasting, variance and trend analysis, ROI analysis, Anaplan, Power BI, Tableau, Excel (Power Query, VBA, PivotTables, XLOOKUP, SUMIFS).

Programming & web: SQL, Python, JavaScript, React, Node.js, Express.js, Next.js, HTML, CSS, Bootstrap; working knowledge of Java and Django.

Data & tools: Microsoft SQL Server, MySQL, PostgreSQL, MongoDB, Pandas, NumPy, Git, GitHub, Docker, AWS.

PROFESSIONAL EXPERIENCE

Financial Data Analyst | Compass Group Canada, Ontario | May 2025 - Present

- Support financial planning and analysis across multiple dining units, including budgeting, forecasting, expense monitoring, and performance reporting.
- Use Anaplan and Excel to maintain planning inputs, review forecasts, and compare actual results with budgets and operational assumptions.
- Analyze profit and loss results, investigate sales and expense variances, and present key trends to finance and operations leaders.
- Prepare period-end financial reports, purchasing summaries, and forecasts to support planning and business decisions.
- Evaluate proposed spending and operational changes through cost-benefit and return on investment (ROI) analysis.
- Build and maintain financial models and reports using Excel Power Query, VBA, PivotTables, XLOOKUP, and SUMIFS.
- Support period-end close by reviewing invoices, accruals, sales entries, and supporting records for accuracy and completeness.
- Reconcile vendor statements and financial data across CIMS, Orbit, and Transact; investigate discrepancies and coordinate corrections.
- Explain financial performance, highlight risks, and identify opportunities to control costs.

Data Analyst Co-op | Genious Infotech, Ontario | Sep 2024 - May 2025

- Developed SQL-based reporting solutions, wrote optimized queries, and validated datasets.
- Worked with developers and stakeholders to gather requirements and improve reporting using SQL, Python, Excel, and Power BI.
- Automated recurring reporting tasks while maintaining data quality.

SELECTED PROJECTS

PSW Support Platform | Full-stack application

- Developed a platform for users to discover and book Personal Support Workers, with responsive interfaces and REST APIs.
- Optimized MongoDB queries, reducing API latency by 35%.
- Code: github.com/Kush10022/pswFrontend | github.com/Kush10022/pswbackend

Ticket Kart | E-commerce website

- Built a ticket booking platform with Django, PostgreSQL, HTML, CSS, and Bootstrap.
- Implemented authentication, event management, venue mapping, and dynamic seat selection.
- Code: github.com/Kush10022/TicketMaster

Workforce Analytics Dashboard | SQL and Power BI

- Created workforce metrics and interactive views of attrition by department and employee demographics.
- Used SQL for data cleaning, aggregation, and KPI development.
- Code: github.com/Kush10022/Employee-Attrition-Analysis

EDUCATION

Honours Bachelor of Technology - Software Development | Seneca Polytechnic, Toronto, ON | Sep 2021 - Aug 2025
